

# > Enhancing Learning

YKK AP's innovations let you take sustainable, secure and durable school design to a new level.

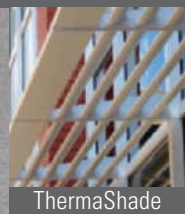

YKK AP is your best single source supplier. Because our products fit the architectural, environmental and economic needs of every school. Like so many YKK AP innovations, our Cradle to Cradle-certified, patented ThermaShade™, the only

thermally broken sunshade, creates opportunities for LEED certification credits. Now we're introducing the unique, new Luminance™ light shelf, which flips down easily to make cleaning a snap. From sun control solutions to YKK AP's wide range of pre-

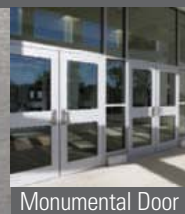

engineered monumental and flush door entrances, everything marries seamlessly with our curtain walls, windows and storefronts for aesthetic consistency. Schools that earn straight A's are built on YKK AP quality.
