

Will future generations remember who took the guesswork out of protection?

- Entrances
- Storefronts
- Curtain Walls
- Sun Controls
- Windows
- Balcony Doors

YKK AP is the leader in sustainable impact protection and blast mitigation solutions for private and public buildings. Our innovative ProTek® system was the first hurricane-resistant glazing system to pass South Florida's strict building codes. Today, our impact-resistant curtain wall is a fully engineered, non-shuttered, thermally improved system that is tested for natural and man-made threats. The exacting tolerances of our pre-engineered systems cut waste, control costs and make installation a breeze. From offices to courthouses to military installations, nothing protects like YKK AP quality.
