

There is a reason why

Skanska USA, Bovis, Hill International and many more are choosing a new way to manage their documents.....

A recent National Industry of Standards and Technology (NIST) study estimates *"\$15.8 Billion is lost each year due to inadequate interoperability of business tools."*

Introducing the **only project document management system that improves workflow productivity during every phase of a project!**

- **Identify New Project Opportunities**
- **Qualify Competent Subcontractors**
- **Bid Coordination**
- **Document Version Control**
- **Expediting Project Close-Out**

**McGraw-Hill Construction Network and Project Document Manager Connect
The Entire Construction Lifecycle**

With one application you can control your Dodge project intelligence and all your documents.

PDM Bidding

is the new and improved web based version of the McGraw-Hill Construction Bid Management System (BMS). PDM Bidding provides users with a sophisticated tool to effectively manage the entire project bidding process.

PDM PRO

is the ideal upgrade for PDM Bidding users who need more powerful tools to capture, organize and distribute construction documents during the entire project lifecycle. PDM Pro incorporates all of the features of PDM Bidding while also providing extensive Design to Close-Out project document management.

PDM Enterprise

is the ultimate configurable version of PDM Pro. Enterprise allows for seamless integration with project management systems such as Meridian's Prolog. Enterprise also provides configurable search attributes, reporting mechanisms, advanced closeout functionality and sub-contractor prequalification features. PDM Enterprise is also highly scalable and can be customized by programming additional end user requirements.
